

# Nanopublication – Argument-mapping software for teaching philosophy, and its licensing and AI debates

by Arnaud Quercy

This is a guest-post announcement of two argument-mapping software tools for philosophy teaching, followed by comments on licensing and AI use – a pedagogical/software item with no engagement with creation, emission, waves, codices, or receiver-diffraction, so the ideamorphism framework has nothing to grip.

DECLINED – NO-PURCHASE [1]

PROPOSITIONAL GRID [2]

**Read this grid.** “Not evaluated” does **not** mean the source has nothing to say about that proposition. It means **the reading did not instruct it**. That is not a result, and it counts in no denominator. A silence, by contrast, is a finding: the reading touched the proposition without concluding, or noted its absence itself.

**Not evaluated (37)** – P1, P2, P3, P3a, P4, P5, P6, P7, P8, P9, P10, P11, P12, P13, P14, P14a, P14b, P15, P16, P16a, P17, P18, P18a, P19, P19a, P20, P21, P22, P23, P24, P25, P26, P27, P28, P29, P30, P31

*Overall verdict: DECLINED:no-purchase – taxonomy of the August 2026 pass, predating the move to relational verdicts. Kept as metadata: the gap between the two forms is data, not residue. This reading’s judgement is in the grid above.*
