

Nanopublication – Quantum States: Objective Reality or an Agent's Personal Belief

by Arnaud Quercy

This is a technical philosophy-of-physics survey on whether quantum states represent objective physical reality or an agent's subjective epistemic state (QBism, pragmatism, decoherence, Bell nonlocality); it makes no claim about artistic emission, reception, codices, or transformation of ideas across modalities, so the only apparent points of contact – 'wave', 'agent', 'subjective' – are vocabulary collisions with unrelated technical meanings in quantum foundations, not conceptual overlap the ideamorphism lens could test.

DECLINED – NO-PURCHASE ^[1]

PROPOSITIONAL GRID ^[2]

Read this grid. “Not evaluated” does **not** mean the source has nothing to say about that proposition. It means **the reading did not instruct it**. That is not a result, and it counts in no denominator. A silence, by contrast, is a finding: the reading touched the proposition without concluding, or noted its absence itself.

Not evaluated (37) – P1, P2, P3, P3a, P4, P5, P6, P7, P8, P9, P10, P11, P12, P13, P14, P14a, P14b, P15, P16, P16a, P17, P18, P18a, P19, P19a, P20, P21, P22, P23, P24, P25, P26, P27, P28, P29, P30, P31

Overall verdict: *DECLINED:no-purchase – taxonomy of the August 2026 pass, predating the move to relational verdicts. Kept as metadata: the gap between the two forms is data, not residue. This reading’s judgement is in the grid above.*

EPISTEMIC PROFILE

Claim type	boundary reading
Voice	third person analysis
Epistemic status	no purchase
Methodology	Boundary-finding lens applied to one source, model claude-sonnet-5, 1 attempt(s), traceability check passed.
