

Nanopublication – Poincaré on convention, geometric structure, and the ordering of the sciences

by Arnaud Quercy

This is a scholarly survey of Poincaré's philosophy of mathematics and physics – conventionalism, geometric structuralism, predictivity, the hierarchy of the sciences – a technical epistemological debate about axioms, conventions and invariance in mathematics and physics, and the ideamorphism framework's vocabulary of emitter, codex, diffraction and reception has nothing to engage there; the one surface overlap, Poincaré's own section title 'Form and Matter' about relations among geometric primitives, names a distinct structuralist concept in an unrelated technical tradition, not the framework's form-as-direction-preceding-execution, so citing it would be manufacturing resonance from a shared word rather than a shared claim.

DECLINED – NO-PURCHASE [1]

PROPOSITIONAL GRID [2]

Read this grid. “Not evaluated” does **not** mean the source has nothing to say about that proposition. It means **the reading did not instruct it**. That is not a result, and it counts in no denominator. A silence, by contrast, is a finding: the reading touched the proposition without concluding, or noted its absence itself.

Not evaluated (37) – P1, P2, P3, P3a, P4, P5, P6, P7, P8, P9, P10, P11, P12, P13, P14, P14a, P14b, P15, P16, P16a, P17, P18, P18a, P19, P19a, P20, P21, P22, P23, P24, P25, P26, P27, P28, P29, P30, P31

Overall verdict: DECLINED:no-purchase – taxonomy of the August 2026 pass, predating the move to relational verdicts. Kept as metadata: the gap between the two forms is data, not residue. This reading's judgement is in the grid above.

Reading of 2026-09-11 · model claude-sonnet-5 · source 130,529 chars · 1 attempt(s)
