

Nanopublication – Press-release exegesis mimics the given/instituted split – but so would any wall text

by Arnaud Quercy

The fit is real but indiscriminating: any press release or wall text that pairs a material description with an artist's stated meaning would satisfy the given/instituted shape equally well – the article gives no occasion to test whether the 'instituted' layer here is a stable codex requiring dialogue to access (P3a's actual claim) versus simply the self-evident gloss art journalism routinely supplies. Nothing in the text concerns reception, multiple receivers, or diffraction (P16, P17), so those propositions have no purchase at all here – the piece never leaves the emitter's declared intent.

CONTEXT

☒ **Thin page** – the source itself is thin (teaser, notice, paywalled preamble). Distinct from truncation: nothing was cut by the pipeline.

WHAT THE SOURCE SAYS [1]

A Hyperallergic listicle previews New York gallery and museum shows for Indigenous Peoples' Day, describing works by artists such as Cannupa Hanska Luger and Shelley Niro – their materials (ironstone clay, sumi ink, railroad spikes, hand-painted overlays on 1990s photographs) – and pairing each description with the artist's or curator's stated meaning (colonial history, collective memory, Indigenous womanhood). The piece is a guide, not criticism: it catalogues shows and quotes artist statements rather than analyzing audience response. The page itself cuts off after two of the seven listed exhibitions behind a sign-up wall.

WHERE THE LENS GRIPS

P3a's given/instituted split finds a surface match: the material description of Luger's blackened sculpture (bison, yarn, railroad spikes – the given, what a viewer sees unaided) is paired with 'per the artist, the work emphasizes the bizarre and horrific history of colonialism' (the instituted, deciphered only via the artist's declared logic). The text's own structure – describe surface, then quote stated intent – reproduces the two-layer shape.

WHERE IT BREAKS

Nothing – the reading reports none. The field is left empty by design: inventing an edge where the lens grips cleanly, or a grip where it fails, is the very fault this instrument exists to avoid.

PROPOSITIONAL GRID [2]

Read this grid. “Not evaluated” does **not** mean the source has nothing to say about that proposition. It means **the reading did not instruct it**. That is not a result, and it counts in no denominator. A silence, by contrast, is a finding: the reading touched the proposition without concluding, or noted its absence itself.

Evaluated

proposition		audit status	relational verdict
P3a	Double Structure of the Invariant	audited	triviality-warning

What was instructed. These propositions have been judged and carry a current statement: it is **that** statement the reading tested, not the founding one.

• **P3a** – judged in Note 05 · current statement : say GIVEN invariant and INSTITUTED invariant, never 'physical' and 'intentional' – the axis is MODE OF EXISTENCE, read as regime of access: the given is what a sensor measures on the surface WITHOUT the codex; the instituted is the rule that elects relations in that surface and that only the disclosed codex deciphers

Not evaluated (36) – P1, P2, P3, P4, P5, P6, P7, P8, P9, P10, P11, P12, P13, P14, P14a, P14b, P15, P16, P16a, P17, P18, P18a, P19, P19a, P20, P21, P22, P23, P24, P25, P26, P27, P28, P29, P30, P31

Overall verdict: Cheap fit – taxonomy of the August 2026 pass, predating the move to relational verdicts. Kept as metadata: the gap between the two forms is data, not residue. This reading's judgement is in the grid above.
